

WISA®-Spruce Multi use plywood panels

Strong, lightweight and versatile, WISA®-Spruce offers superior performance and value. Designed for structural and load-bearing applications it is easy to handle and work with. It is made from environmentally certified Nordic Spruce and meets all the relevant environmental standards. WISA®-Spruce plywood acts as a carbon sink throughout its lifetime and its life cycle contribution to fossil CO2 emissions is very low.

The climate benefits of the product are listed in its Environmental Product Declaration (EPD), in accordance with EN 15804:2012+A2:2019 and third party verified. The sustainable construction panel has many variations – all of which maintain the superior characteristics and technical functionality of the original WISA®-Spruce.

WISA®-Spruce Special

The panel's smooth and solid surface extends use beyond structural applications for joinery, shopfitting, furniture and DIY projects.

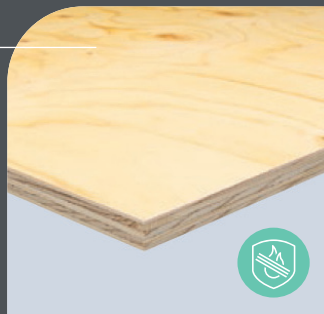

WISA®-Spruce^{WR}

Water repellent panel which saves time at construction site from constant covering against rain. Wood-based surface treatment inhibits the absorption of water – yet allowing the wood to dry after rain.

WISA®-Spruce^{FR}

A structural panel with built-in fire retardancy according to Euroclass B (B-s1,d0 and B_{fl}-s1) - one product to cover the fire safety requirements. Storing, handling and installing a single product instead of several materials is quicker and easier.

WISA®-Twin

Structural panel with spruce core and birch surface. The lightness of spruce plywood and the beautiful light looks of birch - typically used in more visible applications, such as shopfitting, furniture and DIY.

WISA®-Sprucefloor

A half-size purpose made engineered panel with T&G profile in size 2400 x 600mm. A panel specifically designed for flooring applications makes subflooring installation effortless.
