Dear Steven Dennard,

Extension of Assessment Chilt/A13058 Revision D – Moralt Laminesse FireSmoke & FireSafe 44/54mm Doorsets for 30 minutes fire resistance

This letter extends the validity period of the report stated above, that was due to expire on 11th December 2024, until 31st August 2025. The referenced assessment is under review for renewal and once revalidated and issued, will supersede this extension letter.

In order to extend the scope of the assessment until 31st August 2025 as detailed above, it has been deemed necessary to restrict and clarify some of the scope within the assessment. Therefore, the following items shall be observed in addition to the requirements contained within the existing assessment:

- Section 21 does not constitute an opinion on the smoke control performance of the doorset designs contained within the assessment as this report is only intended to cover fire resistance performance.

Please note the caveat below my signature.

Yours faithfully

E Power*

Senior Product Assessor

Note: The field of application report referenced above represents our opinion as to the performance likely to be demonstrated by a test in accordance with BS 476 Part 22 1987, on the basis of the evidence referred to. We express no opinion as to whether that evidence, and/or the report, would be regarded by any Building Control authority as sufficient for that or any other purpose. This report is provided to the client for its own purposes and we cannot opine on whether it will be accepted by Building Control authorities or any other third parties for any purpose.
